

brandbased

— Brand Console

Product Handbook: a page-by-page reference covering every dashboard module, Freemium & Premium flows, shared chrome, popups, and dev tools.

AUDIENCE: PRODUCT · DESIGN · BACKEND · SUPPORT

Plan Tiers at a Glance

Premium

- Up to 12 Premium + 12 Freemium brands (24 total)
- Full module access: Theme Styles (7 slots), Products (7 slots), Hotspots, AI Logic, Ad Campaigns, Metrics, Payments, Scheduling, Platforms
- Header chip reads "Account & Subscriptions"; "Get Premium" CTA is hidden

Freemium

- Up to 12 Freemium brands; no Premium quota
- Restricted to: Brands, Brand Settings, Theme Styles, Hotspots, and upload/verification flows
- Header chip reads "Account"; "Get Premium" CTA visible — opens Unlock Premium gate
- Premium-only routes covered by full-viewport Unlock Premium gate

❗ Both tiers are simulated locally via the dev tool's " — dashboard tier preview" control, writing `localStorage["bbDevDashSimulateFreemium"]`.

brandbased

Dashboard Chrome

Header

Animated blue accent line, Account chip (top-right), Get Premium pill (Freemium only), decorative video on Start Now (desktop only).

Account Dropdown

Subscriptions · Preferences · Theme Light/Dark toggle · Logout. Subscriptions surfaces the Unlock Premium gate for Freemium users.

Sidebar / Footer

Nav items wired via `data-route`. Router swaps iframe src, shows loader, updates `?page=` in address bar, strips per-module decorative backgrounds.

Footer

+ © pinned left (5px in). Footer is right-anchored; B + copyright nudged left independently.

brandbased

Core Module Pages

1

Start Now

Entry point. "Go Premium" → Premium upload flow; "Start FREE" → Freemium upload flow. Excluded from Unlock Premium gate.

2

Brands

Grid of brand circles (up to 8 across). Add Brand popover offers Freemium or Premium. Delete opens danger confirm popup. Excluded from Unlock Premium gate.

3

Brand Settings

Separate HTML files for Premium and Freemium. Purple side panel links differ — Freemium omits Premium-only routes.

4

Theme Styles

Premium: 7 slots (accent, background, typography, CTA label, etc.). Freemium: 1 slot per brand. Both use hard-refresh + inner-scroll layout.

Premium-Only Modules

→ Products

7 slots mirroring Theme Styles indices. Hard-refresh + inner-scroll behaviour.

→ AI Logic

AI rules configuration surface. Aliased to Admin-Team-Console-Brand-Settings-AI-Rules.html.

→ Ad Campaigns · Metrics · Payments · Scheduling · Platforms

All Premium-only. Hidden behind the Unlock Premium gate when Freemium mode is active.

Upload, Verification & Hotspots

Upload Brand Assets

Light/dark logo uploads with cropper modal. "Sync" button triggers shared sync popup. Premium continues to Meta-Verification.html; Freemium stays in /freemium/ — flow can never escape to Premium pages.

Brand Verification

Side-by-side Light/Dark preview. Pass: green badges + "Brand Successfully Verified." Fail (dev toggle): red badges + "Unable to Verify Brand. Please contact support@."

Hotspots

Premium: interactive product hotspots on brand assets. Freemium: simplified single-asset file. Router force-reloads iframe once on arrival so page lands at top.

brandbased

Shared Popups & Modals

Sync Popup

Glass card with B logo (breathing pulse) + animated progress bar. Phases: fill → done beat ("Syncing" → "Synced") → fade out. postMessages up to dashboard level to cover chrome + iframe.

Confirm Popup

Same iframe-forward pattern. Title + body + Cancel/Confirm buttons. Danger variant (red B icon, red halo) used for Delete Brand and Delete Account.

Preferences Modal

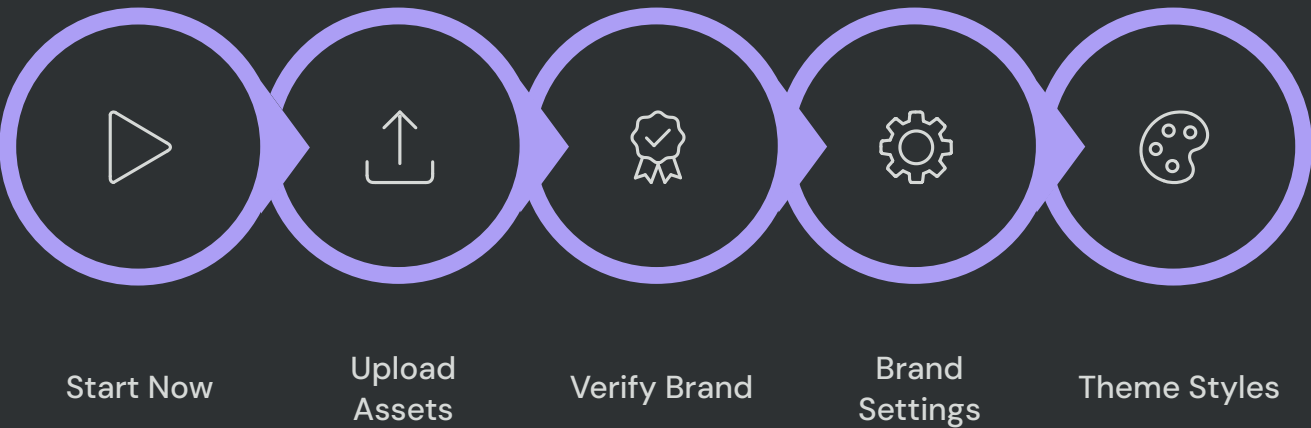

z-index 200000. Shows PREMIUM (blue) or FREEMIUM (amber) subscription badge. Fields: email, password. "Delete Account?" link opens danger confirm popup.

Unlock Premium Gate

Full-viewport frosted glass. "Upgrade to Premium..." message. Excluded paths: /freemium/ URLs, Start Now, Brands page. Triggered by Get Premium button, Subscriptions click, or Add → Premium in Freemium mode.

End-to-End User Flows

Freemium Journey

Premium Journey

01

Start Now

"Go Premium" CTA

02

Upload & Verify

Logo upload + crop + verification

03

Brand & Theme

Brand Settings + 7-slot Theme Styles

04

Products & Hotspots

7 product slots + interactive hotspots

05

Full Suite

AI Logic, Metrics, Payments, Platforms, Scheduling, Ad Campaigns

Dev Tools & Toggles

Located at [brand-modules-bundle/dev/export-settings.html](#) — exports persisted dashboard state and previews UI states without breaking real flows.

bbDevVerifyState

"fail" → Brand Verification renders red/cross/"Unable to Verify" failure state.

bbDevDashSimulateFreemium

"1" → Freemium simulation: Unlock Premium gate, swapped chrome, narrower module set.

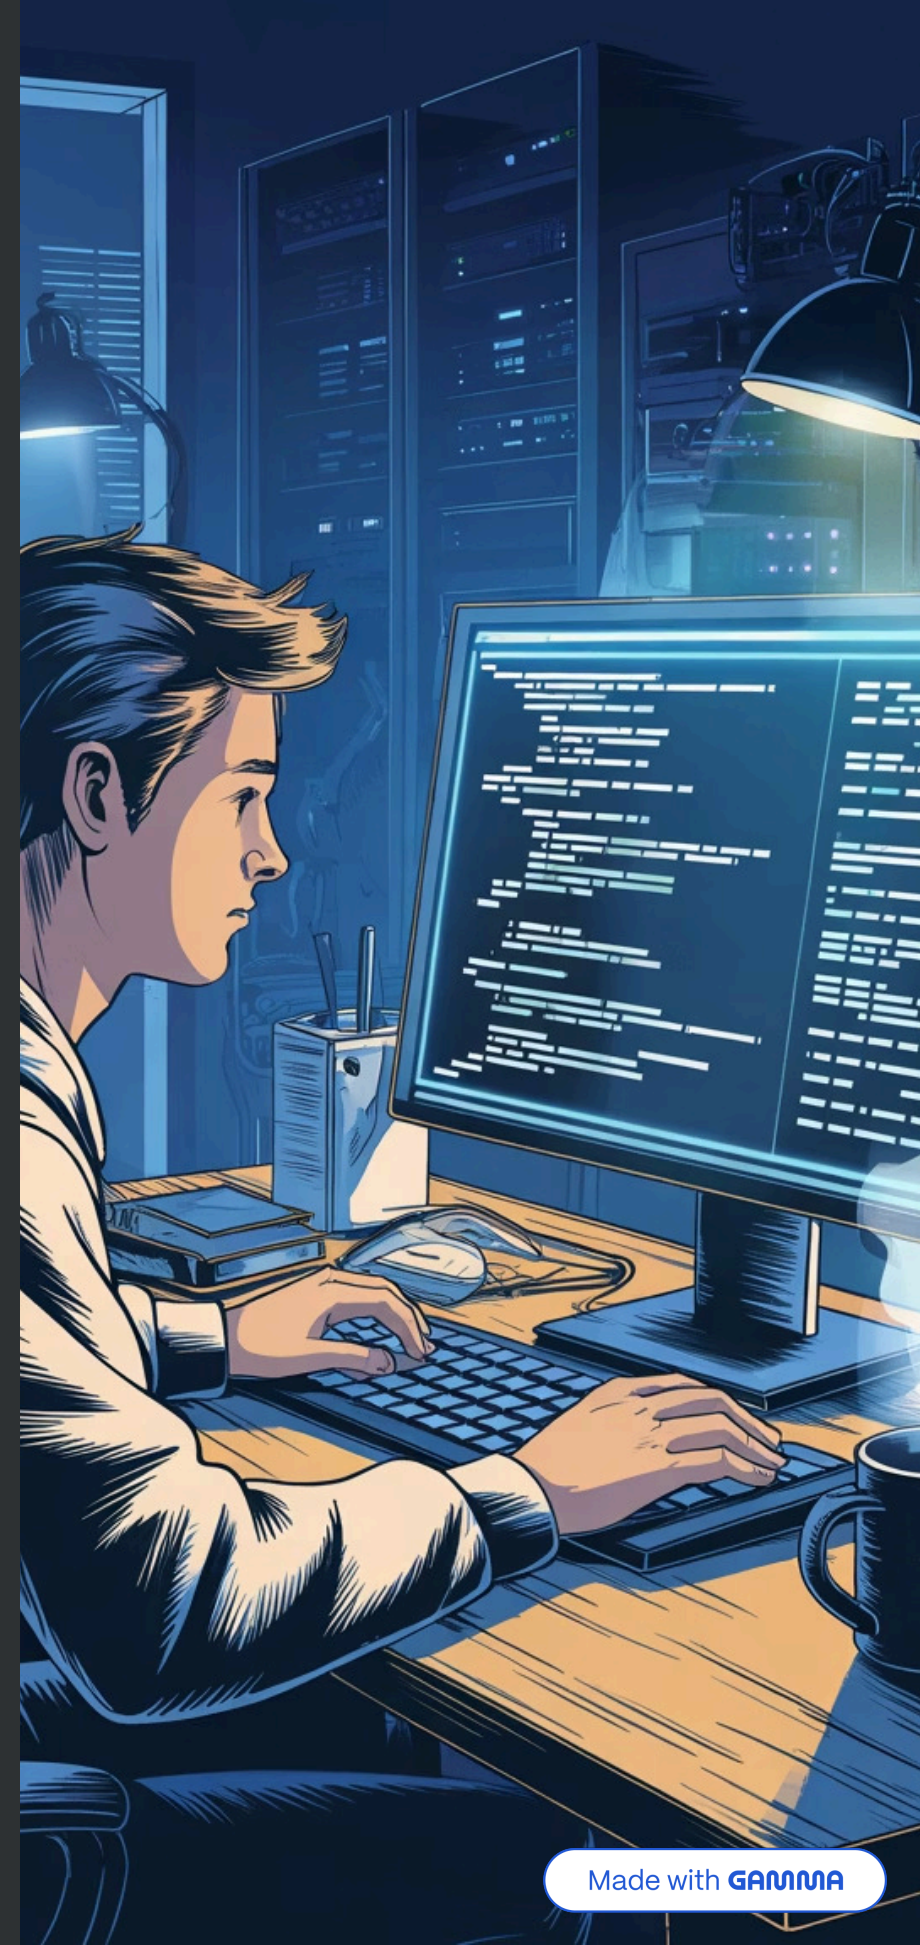

bbDevStripeVerifyOpen

Pops the Stripe purchase verify modal on the dashboard from another tab.

bbDevShowPlanTier

Shows the Premium pill on each brand circle on the Brands page.

⚠ All dev-only keys are intentionally omitted from JSON/PHP bundles to prevent leaking into production data.

File Map & Glossary

Key File Locations

Dashboard Shell

brand-console-
final/brand-console-
dashboard.html

Freemium Gate

brand-console-
final/js/bb-dev-freemium-
gate.js

Standalone Modals

premium-and-freemium-bb-modals-standalone/

Router

final/js/dashboard-
router.js

Shared Popups

brand-modules-
bundle/_shared/sync-
popup.{js,css}

Glossary

Slot

A persisted Theme Styles
or Products config.
Premium has 7 per brand;
active slot drives the
popup modal.

Glass Card

Frosted-translucent
surface used by sync
popups, Preferences,
Stripe verify, Brand
Support, and Unlock
Premium.

Hard Refresh

Reloading the dashboard
at ?page=<id> instead of
swapping the iframe —
used for Theme Styles
and Products.

Route Alias

A URL pattern in
ROUTE_ALIASES that
maps back to a route so
sub-flow pages still
highlight the correct
sidebar item.
